Michelle, I just wanted to follow up on this email. Meridian has the option to delete all PAM data and requests again to delete such data. Due to any potential spoliation claims, I have informed Meridian that it cannot delete any evidence related to PAM. Please advise as Meridian incurs storage costs and this will be added to the damage model. Please advise if you will agree that existing PHI can be destroyed as expressly permitted under the contracts. Your prompt attention to this matter is appreciated.
